Opticron Gallery Scopes are of a very high quality both in their performance and construction. We guarantee some parts in these instruments for up to 30 years under the following conditions:

- (i) In the case of defects attributable to faulty processing or materials, we will assume responsibility for the labour and material costs during the first 10 years after purchase. We reserve the right to decide whether defective parts should be repaired or replaced.
- (ii) During the next 20 years we will assume responsibility for material costs only, charging corresponding labour costs.
- (iii) We will accept no liability for damage caused by incorrect use, water penetration - unless the unit is specified to be waterproof, or for any repairs or actions which have been carried out outside our firm.
- (iv) Parts such as carrying straps, rubber eyecups, rubberised coatings etc. are excluded from the guarantee.

This guarantee is in addition and does not affect your statutory rights.

Registration

If you would like to register your purchase with us please visit www.opticron.co.uk and complete the online Product Registration Form.

Alternatively please telephone us during normal working hours on the numbers given. We will need the product name and serial number (if applicable), purchase date and outlet, your name and postcode.

Registration is voluntary and failure to register will not diminish your rights under the guarantee.

Privacy

Opticron takes your privacy seriously and we do not share personal information with other companies.

User Instructions

Monoculars can open up a whole range of new and exciting impressions when travelling on holiday, taken to sporting and leisure events or used as part of a hobby such as bird or butterfly watching. To help you get the best results from your equipment please read the following instructions carefully.

Focusing. To focus at different distances simply rotate the focusing band until a clear and sharp image is obtained.

Adjustable Strap. Packed separately with each monocular the strap is fitted by clipping onto the lug on the body of the monocular.

Rubber Eyecups are designed to position your eyes correctly to get the maximum comfortable field of view with or without glasses.

Using glasses. To maximise field of view with glasses on, fold the rubber eyecup to the 'down' position - remembering to fold it back up if you or anybody else wants to use the instrument without glasses.

Close Focus Scale. The body of the Gallery Scope has a printed scale to help with macro focusing.

Compact Microscope. The Gallery Scope can be converted to a compact microscope by connecting the 30259 Microstand with LED illuminator (Available to purchase separately). This useful accessory multiplies basic monocular magnification by a factor of 3.

Care and cleaning. Monoculars require little maintenance but occasionally the outside surfaces of the eyepieces and objective lenses will need cleaning. To avoid damaging these surfaces please read the following instructions carefully.

- (i) Gently remove excess dirt and dust using compressed air or blower brush.
Caution: Hard and persistent rubbing of dirty surfaces can cause abrasive scratches on the surface of the glass which may distort viewing.
- (ii) Breathe on exposed glass surface and then wipe with an optical cleaning cloth (code 30277) in a circular motion until the surface is clean again.

Do not attempt to dismantle the instrument as this will invalidate the guarantee.

Cold weather. In cold weather, equipment not hermetically sealed and filled with nitrogen may steam up due to heat transfer from the hands through the casing to the cold air trapped inside. Try to avoid this by using gloves and leaving the instrument to stand when transferring from a cool to a warm environment.

WARNING. Never under any circumstances use this monocular to view the Sun. Doing so will cause serious damage to your eyes.

We hope you will get a great deal of pleasure from your new Gallery Scope. If you have any problems or damage it in any way our Service Department is on hand to help you.
