

## 50065 DCC adapter - compatibility with Opticron eyepieces

The following list shows which insert (or set of inserts) are required to fit a particular eyepiece. Prices of recommended eyepieces; HDF T 40810, HDF T 40937 and HR 40812 are listed in the table below.

50066 ø51	50067 ø45.5	50068 <sup>1</sup> ø41.5	50069 <sup>2</sup> ø33
HDF T 40862	HDF T 40810 HDF T 40937 HR2 40933 HDF T 40872 HDF T 40809 HDF 40862	HDF 40810 HDF 40809 HR2 40930 HR2 40931	HR 40812 HR 40813 MM2 40903

<sup>1</sup>50068 insert only fits in combination with 50067 insert

<sup>2</sup>50069 insert only fits in combination with 50068 and 50067 inserts

## Accessories

Chosen specifically to compliment the camera, cradle mount and DCC adapter, the following accessories are included as part of the kits and are also available separately.

### SD memory 1Gb

**Image Storage:**  
**5M** (2592x1944 pixels)  
 S.FINE 387 exp FINE 747 exp  
**4M** (2272x1704 pixels)  
 S.FINE 506 exp FINE 951 exp  
**MOVIE** (640x480) 30FPS  
 1hr 9min approx

### Cable release

25cm cloth. Supplied with cable release arm. Code: 50082

### Li-ion battery

SLB-0737 3.7V 760mAh or NP-40 3.7V 710mAh  
 Code: 50079

### Battery charger kit

Includes mains and 12v in-car charger, carrier for NP-40 battery. Code: 50080

## Pricing

Code	Model	SRP inc VAT
50077	<b>i5 / DCC Kit</b> price includes; i5, 50081, 50082, 50079, 50080, 50071, 50065, 50066 & 50067	399.00

## Digital Compact Camera Kits for Telephotography

featuring 50064 SDL DCC Adapter or 50065 DCC Adapter

## Product Information & User Guide

including Retail Price List

June 2006

Opticron/Samsung digital compact camera kits are a high quality, easy to use solution to the problem of choosing a suitable digital compact camera for high magnification telephotography (digi-scoping).

The main components of the kit comprise of a Samsung i5 camera with a bespoke cradle mount plus the option of either a DCC adapter for connection to selected HDF T, HDF, HR2 and HR eyepieces or an SDL DCC adapter for connection to the 40935 SDL eyepiece. The kits also include some useful accessories such as a high capacity SD memory card, cable release arm + cable release, spare battery and in-car charger.

## Product information

Camera shown with cradle mount

### Samsung i5 camera

- 5.0 mega pixel CCD
- SHD lens f.6.6~19.8mm with 3x optical zoom  
35mm equivalent; 39mm to 117mm  
Magnification; 0.78x to 2.34x
- F3.5~F4.5
- TTL auto focus AF
- Macro: 5~50cm (wide)  
Super Macro: 1~5cm (wide)
- Shutter 1~1/2000
- ISO: Auto, 100, 200, 400
- Safety Flash\*
- 11 scene modes
- MPEG-4 30fps VGA movies
- 2.5" colour TFT LCD screen
- PictBridge compatible
- Ultra thin (17.3mm) stainless steel body. (LxW 89.6mmx59.8mm)  
Weight: 133g (w/o battery & card)

**Supplied complete with 3.7V Li-ion rechargeable battery, cradle charger and software**

### 50064 SDL DCC adapter

The SDL DCC adapter mount consists of a 2 piece locking ring in aluminium combined with a flexible delrin insert. Camera side, the adapter features a 28mm screw thread connection to the cradle mount supporting the camera.<sup>1</sup> Eyepiece side is a push fit connection over the 40935 SDL eyepiece with anti-clockwise lock down.

<sup>1</sup>The 5mm spacer supplied should be fitted when using the SDL eyepiece at its lowest magnification.

### 50065 DCC adapter

The DCC adapter consists of a 2 piece locking ring in aluminium combined with a flexible delrin insert. Camera side, the adapter features a 28mm screw thread connection to the cradle mount supporting the camera. Eyepiece side is a push fit connection over specific HDF or HR eyepieces with anti-clockwise lock down. Inserts are available in a choice of internal diameters to suit different eyepieces;

- 50066 Ø51mm
- 50067 Ø45.5mm
- 50068 Ø41.5mm<sup>1</sup>
- 50069 Ø33mm<sup>2</sup>

<sup>1</sup>50068 insert only fits in combination with 50067 insert.

<sup>2</sup>50069 insert only fits in combination with 50068 and 50067 inserts.

## User instructions

### Choosing an eyepiece (50065 DCC adapter only)

#### HDF/HR eyepieces

For best overall image quality and the widest choice of magnifications at which a full frame image is obtained use any of the following eyepieces: **HDF T 40810**, **HDF T 40937** with 50067 insert or **HR 40812** with 50069 in combination with 50068 and 50067 inserts.

Depending on the focal length and objective dia. of your telescope, other suitable eyepieces may include; HDF T 40862, HDF T 40872, HDF T 40809, HR2 40933, HR2 40930 and MM2 40903.

#### 1. Initial setup

Before connecting everything together, set up your telescope and eyepiece on a tripod as you would for viewing - making sure your chosen eyepiece is screwed firmly into position. Focus on an object in the normal way until the image being viewed comes into sharp focus. Twist-type eyecups should be put in the 'down' position and fold down rubber eyecups should be removed.

[Fig. 1]

#### 2. Preparing the camera and cradle mount

- Open the cradle mount to its fully extended position and slide it over the camera body as shown in [Fig. 1]
- Ensure that the inside edge of the cradle fits flush against the side of the camera body. Using the hexagonal key supplied, tighten the screw until the mount feels secure. [Fig. 2]

**WARNING. DO NOT OVER TIGHTEN**

[Fig. 2]

#### 3. Preparing your chosen DCC adapter and fitting the cradle mount

- Assemble the component parts of your chosen DCC adapter as illustrated on previous page
- Screw the adapter to cradle mount [Fig. 3]

[Fig. 3]

#### 4. Fitting the cable release arm (optional) [Fig 4]

In combination with the 25mm cable release, this attachment reduces shake when operating the shutter. To fit, slot the arm into the recess (top surface of the cradle mount) and fix into position using the two hexagonal headed bolts supplied.

[Fig. 4]

#### 5. Fitting the combined assembly to the telescope eyepiece [Fig 5]

- Place your chosen DCC adapter over the eyepiece and push down until the internal wall contacts with the end of the eyepiece [a]
- Hold the main section of the adapter secure and turn the locking ring anti-clockwise until tight making sure the camera remains horizontal [b]
- Turn the camera ON. For instructions on how to operate the camera, please read the instructions supplied with the camera.

#### Tips for taking pictures

- The i5 has no conventional viewfinder so images are composed using the LCD monitor. When the camera is turned on the LCD monitor will show a single rounded picture of the image you originally set your scope and eyepiece to. Once this single rounded picture is obtained you can adjust the zoom function to eliminate any vignetting and make any fine focus adjustments using the telescope.
- Use the focusing on the telescope to focus at different distances.

[Fig. 5]
